Commercial Gazettz.—When gold stood at its top notch figure of \$9 \$5 in 1984, mea who had no condidence in the Government were huying and storing it for future use. These investors were called fools, and so they were, for a pear afterward gold was at \$1.35, and from that time aimost stendily declined until the premium was wiped out. It would, we suppose, be unparticult to call Uncle Sama fool, yet with all his financial experience he has heen constantly huying up pig silver at the rate of one hundred and forty tons a month, giving his credit notes in payment. With half an eye any man of common business esses could see that this cornering of the silver market on the plea of keeping the metal in parity with gold must sooner or later be broken and force gold to a premium. We are bound to say that in this transaction Uncle Sam has shown himself unwise.
